(Rs in Lacs)

ECONOMIC SCENARIO

The global economic scenario in 2013 remained challenging with output growth estimated at 3.0% - lower than the 3.2% growth recorded in 2012. Global economic activity picked up in the second half of the year, with much of the impetus coming from the Advanced Economies, raising hopes for an improved performance in 2014. The US economy grew by 1.9% in 2013, with the continued recovery of private domestic demand partly offset by the impact of heavy fiscal consolidation, which is estimated to have subtracted around 150 basis points from GDP growth. While the Euro Area contracted by 0.5% during 2013 as compared to 0.7% in the previous year, the region finally emerged from recession with output growth being positive from the middle of 2013 on the back of less fiscal drag and some buoyancy in private domestic demand. Global growth is expected to improve in 2014-15 following the late recovery observed in 2013. As per IMF estimates, world GDP growth is projected to strengthen from 3.0% in 2013 to 3.6% in 2014 and 3.9% in 2015, largely driven by the Advanced Economies, where growth is expected to increase from 1.3% in 2013 to 2.2% in 2014 and 2.3% in 2015. Despite the improved prospects as stated above, global economic recovery remains fragile with significant downside risks.

Closer home, the Indian economy witnessed a rather challenging year with GDP growth slowing down to sub-5% for the second year in succession. The slowdown in the pace of growth is largely attributable to weakness in Industry which grew by only 0.7% during the year as per Advance Estimates released by the Ministry of Statistics and

Programme Implementation. The Manufacturing sector, which accounts for 55% of Industry, de-grew by 0.2%. Growth in the Services sector stood at 6.9%, well below the trend growth levels. The only bright spot in an otherwise lacklustre economy was the Agriculture sector which grew by 4.6%, with record agricultural output. Inflation remained high and sticky for most part of the year leading to the RBI hiking the Repo rate by 75 basis points since May '13. While headline inflation has moderated in recent months, Core CPI inflation remains elevated at around 8% leaving little room for the RBI to ease policy rates to spur growth. While India remains one of the fastest growing major economies in the world, the slowdown in economic growth in the last 2 years is a cause of concern, being far below the desired levels and the country's potential. Given the low levels of per capita income and the fact that a significant proportion of our population lives in poverty, it is imperative that the economy reverts to its 8% to 9% growth trajectory sooner than later. Your Company's business performance was adversely affected by weak market sentiment resulting in losses.

OPERATIONAL REVIEW, OPPORTUNITIES AND THREATS

During the financial year under review, the company incurred loss after tax Rs.98.18 Lacs against loss of 110.04 Lacs in the previous year. The management of your company expects improvement in the current year with the stabilization in the business sentiments. The company is continuing with task to build businesses with long term goals through intrinsic strength in corporate and investment research. To accelerate further value creation, your company continues to work on new fields through collaboration, association and strategic investments. Outlook for the Company is linked to financial & commodities market with local & global sentiments. The Board of the company believes that Company's Investments in Commodities, forex and derivative products would reasonably perform in ensuing years. The Company is exploring opportunities in the sphere of forex, commodities and derivative products for long term value creation, by way of collaboration, association and strategic investments. The performance of the company would be closely linked to the Indian Financial Market, commodities market & global currency fluctuations and consequently to the risks associated with market operations. The performance of Indian financial & commodities market are in correlation with the economic growth of the country as well as global economy, performance of various sectors, inflation, global market, etc. Instability of any of the factors may affect the markets adversely. The financial market also covers hedging to protect against excessive losses and to avoid the uncertainty associated with future exchange rate movements more particularly associated with the sharp depreciation of the local currency which has been the case in the recent past.

We conducted our audit in accordance with the Standards on Auditing issued by the Institute of Chartered Accountants of India. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and the disclosures in the financial statements. In making those risks assessments, the auditor considers internal control relevant to the company's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the company's internal control. An audit also includes evaluating the appropriateness of the accounting policies used and the reasonableness of the accounting estimates made by the management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.
